MAGELLAN
Transport Logistics

A complete solution to all your needs...

transport logistics, warehousing and supply chain management.

MAGELLAN

Transport Logistics

provides cost effective, reliable and personal logistics services to businesses of all sizes throughout North America. We manage relationships with transportation partners so our customers can concentrate on their core business. We have the technology, experience and expertise to solve logistics challenges and move products from origin to destination, anywhere in the world.

Why Choose Magellan?

Innovative solutions and supply chain analysis that fit our customers' needs.

Single shipments, full service coordination, warehousing, and transportation coordination.

One contact person for all of your shipping needs.

Trusted relationships with asset-based transportation and warehouse providers.

Critical and time-sensitive shipment management.

Access to our service team and customer account managers 24 hours a day.

Truckload With a DOT network of more than 170,000 recognized asset-truck providers, Magellan Transport Logistics creates the contractual partnerships with these carriers to properly match the needs of our customers with the fulfillment requirements of our carrier partners. We simplify the process by committing our team to always talking with and listening to our carrier partners, resulting in a clear definition of their needs and ultimately a seamless and precise execution of our customer's truckload shipments.

- Dry van, refrigerated, flatbed, stepdeck, dropdeck
- Thousands of contracted carriers throughout North America
- More than 400,000 pieces of equipment: 40', 45' 48', or 53' trailers
- Satellite tracking and communication with tractors
- Direct communication with carrier dispatch
- Speak with each driver on every load at dispatch, arrival at origin and destination, and completion of shipment
- The same commitment to service whether you have 1 or 1000 loads per month
- Over-dimensional, overweight, oversized, and other special project shipments

Less-Than-Truckload With the changing landscape in the transportation industry, and the always changing and improved service offerings by less-than-truckload providers, having a clear understanding of which carrier to use for which shipment and how that carrier discount truly applies to that shipment can be a daunting task to manage. Magellan Transport Logistics simplifies this task by providing our customers with expert personnel to review our customer's shipment patterns to find and build efficiencies within the shipping process.

Utilizing its relationships and contractual partnerships with a regional and national carrier base, Magellan Transport Logistics can handle a single shipment or a single source management of all shipments.

- One system to manage all shipments with multiple carriers
- No need to negotiate rates with numerous less-than-truckload carriers
- Volume discounts with regional and national carriers
- Electronic tendering and real time tracing
- Drive efficiency with managed LTL consolidation for real dollar savings
- Improved carrier results through real time management

Truckload

Less-Than-Truckload

Intermodal For single shipments, high-volume opportunities or bulk shipments, Magellan Transport Logistics offers rail intermodal service utilizing its extensive professional knowledge of this ever changing market and continuous enhanced offerings. Developing dedicated and loyal relationships with all the major railroads and truckload rail providers allows Magellan to present a straightforward and effortless rail management program.

- 100% service throughout North America (United States, Canada, & Mexico)
- Communication with rail and drayage partners through live communication and/or EDI
- Significant cost savings with effective transit time management
- Truckload conversion opportunities identified
- Single system management of all rail partners and shipments

Air Freight When air is the transportation mode of choice or requirement, Magellan Transport Logistics' experienced staff can manage the entire process from door-to-door. Magellan utilizes contracted air carriers for the air segments, and its extensive network of OTR and Drayage carriers for the ground segments.

- Both domestic and international air freight services
- Custom handling, by the case or pallet
- Next day or 2nd day service
- Bonded and custom house brokerage services
- Heavy cargo or charter air transport services

International In today's global marketplace, reliable, quality shipping worldwide is a must. Magellan Transport Logistics offers unsurpassed excellence in international shipping services through a single global system that offers real time visibility from origin door to destination door.

- Full 20', 40' and 45' container loads, using contracted ocean carriers
- Less-Than-Container loads
- Origin consolidation and destination deconsolidation
- Import/export documentation and customs brokerage
- Offering a true door-to-door management service

Intermodal

Air Freight/International

Warehousing How and where inventory is stored, cross-docked, and transloaded is as important as where the shipment is going. Magellan Transport Logistics utilizes the skills of a highly trained and professional team to offer you the highest quality management, security and service for all your warehousing needs.

- Storage, Pick & Pack, Deconsolidation, and Distribution
- Proprietary system for quick, easy enhancements solutions
- Special project processing and handling
- Team up with partnering warehouses for short term solutions
- Online, web-based, real-time product inventory visibility

Supply Chain Management The most effective Supply Chain Management system is the one that works for your organization and addresses your unique needs. Magellan Transport Logistics' knowledgeable professionals can help you design and implement a supply chain management strategy from order initiation to order fulfillment. We will analyze your present system, including current carrier selection, costs, and internal processes, and will develop a solution that works for you.

- Strategic partners and network optimization
- Transportation management and visibility
- Single system for global visibility from raw materials to shipment of finished goods to final end user
- Inventory control management and distribution
- Integrate all functions and personnel responsibilities within the supply chain
